\*Returns from April 2023 onwards have been generated using FactSet models with an Annual Management Charge determined from live client portfolios being applied on a monthly basis. This performance is model based and therefore is an indicative figure. Prior to April 2023, returns for these strategies were generated from live client portfolios on a net of fees basis.

## Overview

Our Corporate Bond Strategy invests in a diversified portfolio of largely investment grade bond issues, providing a balance of income and liquidity. The portfolio aims to provide positive total returns, and offers the option of either taking or reinvesting income.

The segregated portfolios are directly invested and designed for private clients, fiduciaries and charities with a minimum of \$1,250,000 available to invest. The Corporate Bond Strategy does not aim to reproduce a "benchmark" return, but rather focuses on meeting investor expectations. The strategy is available in £, \$ and €.

## Key Facts

<b>Launch date</b>	01.04.2011
<b>Currencies available</b>	£, \$, €
<b>Minimum investment</b>	\$1,250,000
<b>Average modified duration*</b>	4.18
<b>Current yield</b>	4.75%
<b>Yield to Maturity</b>	5.74%
<b>Number of holdings</b>	22

\* The average modified duration indicates the estimated percentage change in the portfolio's value for a 1% move in interest rates.

## Important information

All data provided by Brooks Macdonald, unless otherwise stated, as at 31.03.2024

Corporate bond investments are subject to minimum trading size and liquidity factors. This means that entering and exiting the investments may often require five to ten working days but occasionally longer.

The information presented in this factsheet, including charges and performance, is for the US Dollar portfolio. Other currencies may be available. Investment markets and conditions can change rapidly and as such the views expressed should not be taken as statements of fact, nor should reliance be placed on these views when making investment decisions. The price of assets in this portfolio and the income from them can go down as well as up and neither is guaranteed. Past performance is not a guide to future results. Investors may not get back the amount invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. Changes in interest rates may impact the value of fixed interest investments within the portfolio. The value of your investment may be impacted if underlying fixed interest holdings default, or market perception of their credit risk changes.
