Management as at  
31 March 2023

# Our multi-asset expertise harnessed across a range of risk profiles

The portfolios are managed by a dedicated team of experienced investment managers, who leverage the global investment expertise of the Brooks Macdonald Group, leaving you free to support your clients' financial goals.

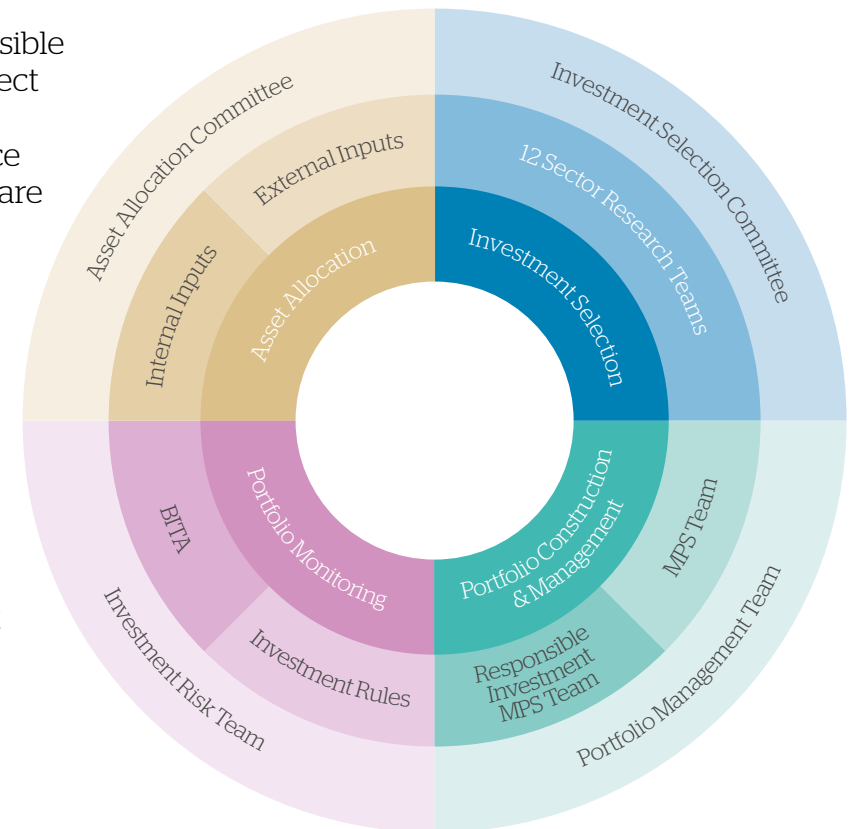

Our asset allocation views and best investment ideas across a broad universe are analysed, debated and refined before being reflected in the portfolios by their dedicated management team.

The Asset Allocation Committee determine the asset allocation for the models, based on in-house and external research. We contrast our internal views on the world with those of a range of external parties for example, independent macro research providers and investment banks. The resulting portfolios are diversified across a broad range of asset classes.

Investment managers across the group are organised into twelve sector research teams. It is the responsibility of each sector team to produce a list of recommended

investments that are judged to offer compelling investment cases. Responsible investing buylist investments are subject to additional screening processes to ensure compatibility with our Advance strategy. Recommended investments are then subject to approval by our Asset Selection Committee, before being included on the central buylist.

The MPS team then construct the portfolios to meet their specific objectives and risk level by selecting investments from our central buylist. The portfolios are actively managed on an ongoing basis and are rebalanced regularly to ensure all clients remain in line with the asset allocation of their chosen model. Risk management tools are employed to monitor the portfolios.

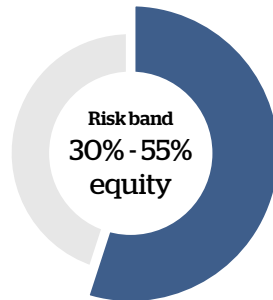

# Active range

The Brooks Macdonald Managed Portfolios are predominantly constructed from actively managed funds and available across a range of five different risk profiles, to be able to match your client's risk tolerance. The Low-to-Medium and Medium risk profiles are available with either Income or Income & Growth objectives.

Low Risk -  
Defensive Income

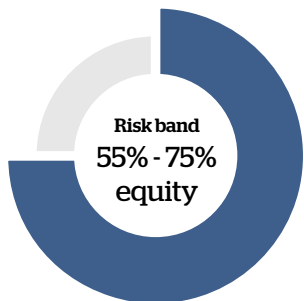

Low to Medium Risk -  
Income

Low to Medium Risk -  
Income & Growth

Medium Risk -  
Income

Medium Risk -  
Income & Growth

Medium to High Risk -  
Growth

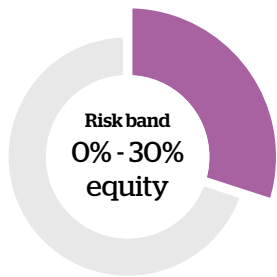

High Risk -  
Growth

# Passive range

The Brooks Macdonald Passive Managed Portfolios are managed in the same way as our Active but constructed using passive underlying investments. They are available across a range of different risk profiles to match your clients' risk tolerance.

Low Risk - Defensive Income

Low to Medium Risk -  
Income & Growth

Medium Risk -  
Income & Growth

Medium to High Risk -  
Growth

High Risk - Growth

# Responsible Investment Advance range

The Brooks Macdonald Responsible Investment Advance Portfolios have the dual objective of aiming to generate income and/or growth over the longer term within the agreed risk profile, while following the Responsible Investment Advance approach. They are available across a range of different risk profiles to match your clients' risk tolerance.

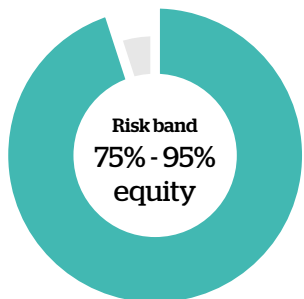

Low Risk -  
Income & Growth

Low to Medium Risk -  
Income & Growth

Medium Risk -  
Income & Growth

Medium to High Risk -  
Growth

High Risk -  
Growth

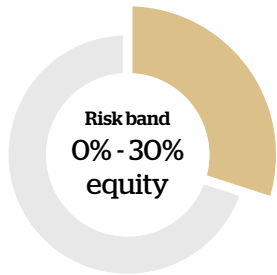

The Low Risk and High Risk Portfolios have not currently been assessed by an independent risk-profiling company to determine their risk rating.

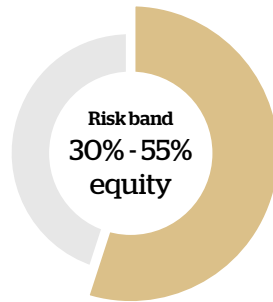

# Volatility Managed range

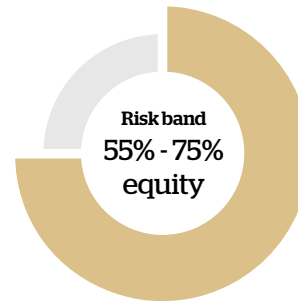

Our Volatility Managed range aims to target the volatility boundaries of five Dynamic Planner risk levels. Strict adherence provides comfort that clients' portfolios remain aligned to their chosen risk level.

Portfolio 3-  
Defensive Income

Portfolio 4-  
Income & Growth

Portfolio 5-  
Income & Growth

Portfolio 6-  
Growth

Portfolio 7-  
Growth

# Environmental, Social and Governance (ESG) integration

To us, acting as a responsible investor means we act as responsible stewards of our clients' capital by integrating consideration of ESG factors into our investment process.

Our Responsible Investment strategy selects investments that align with specific Responsible Investment objectives. Alongside this, we integrate ESG considerations into the analysis of investments held in our 'core' MPS strategies:

ESG issues can be broad and varied:

- **Environmental** - the impact the company has on the environment. Areas of analysis may include carbon emissions, climate related risks, resource depletion (including water, waste management and recycling), pollution, biodiversity loss or deforestation.
- **Social** - the impact the company has on society. Areas of analysis may include human rights, labour rights and standards, inequality, supply chains, local communities, conflicts, health and safety.

- **Governance** - the process by which a company is managed and overseen. Areas of analysis may include executive pay, bribery and corruption, board diversity and effectiveness, shareholder protections and rights, tax strategy, transparency, corporate culture.

We expect managers of all of the third-party funds we invest in to integrate ESG considerations into their investment decisions, as we believe this helps reduce tail risks and allows our investors to potentially benefit from improved risk adjusted returns.

When selecting funds, we conduct due diligence on the managers' approach to incorporating ESG factors into their investment decisions as well as their stewardship activities. We have developed a structured framework for ESG research processes and integration which incorporates input

from qualitative questionnaires, third-party ESG data and fund manager meetings. We do not use third-party ESG data as a screen, instead it is used to highlight areas for further qualitative investigation in four key categories: controversies, carbon related risks, product involvement in controversial weapons and overall ESG risk management.

We expect fund managers to identify and effectively manage ESG related risks in their portfolios and where our research identifies concerns that this might not be the case, we will engage with fund managers - if we are not satisfied with responses, we will not invest. We also conduct ongoing due diligence to ensure fund managers continue to meet our expectations. The funds we can invest in span a variety of asset classes including equity, fixed

interest, property and alternatives as well as passive and active strategies. We are mindful that levels of ESG integration vary across the different asset classes, and we take this into account in our research.

# Important information

This document is intended for professional advisers only and should not be relied upon by any persons who do not have professional experience in matters relating to investments. The value of your investments and the income from them may go down as well as up and neither is guaranteed.

Investors could get back less than they invested. Past performance is not a reliable indicator of future results. Changes in exchange rates may have an adverse effect on the value of an investment. Changes in interest rates may also impact the value of fixed income investments. The value of your investment may be impacted if the issuers of underlying fixed income holdings default, or market perceptions of their credit risk change. There are additional risks associated with investments in emerging or developing markets. The professional adviser remains responsible for advising the client on whether the recommended fund is suitable to the client's personal circumstances.

The Defaqto, Synaptic and eValue ratings are designed to help professional advisers recommend the appropriate fund after they have assessed the client's attitude to risk using these risk profilers. Risk profiling is only a part of overall suitability assessment and this guide should not be relied upon in place of a comprehensive suitability assessment. The professional adviser remains responsible for advising the client on whether the recommended fund is suitable to the client's personal circumstances.

© FinaMetrica Pty Ltd. Risk tolerance scores were mapped to the funds' strategic asset allocations as at December 2022. The mappings are only for use by financial advisers licensed to use FinaMetrica's risk profiling system and do not constitute financial advice. Financial advisers must satisfy themselves that the funds' current asset allocations reflect the risk/ return expectations of the funds when mapped. Brooks Macdonald does pay FinaMetrica for the mappings in the table however these mappings are calculated independently by FinaMetrica. The risk ratings set out in this document have been prepared by Distribution Technology Limited ("DT") and are based on analysis conducted by DT in December 2022.

The stated 'DT risk level' is the risk level attributed to the model portfolio by a third party, Distribution Technology Limited ("DT") following DT's analysis. The stated DT risk level is valid as at the stated date; however, market fluctuations can mean the level of risk in the portfolio might change over time. Brooks Macdonald has not verified the risk level attributed to the model portfolio by DT and makes no warranty as to its accuracy. Accordingly, Brooks Macdonald will not accept any liability arising from any reliance on the stated DT risk level.
