\*Year to Date

Performance figures are net of fees and are based on the 'G' Accumulation Shares (Platform) which do not incur an initial charge. RPI Data is the latest available, normally from a data point at least one month earlier. For example, performance for one year to end April will be shown against the latest RPI information available, i.e. 12 months to end March. The Authorised Corporate Director (ACD) has selected this target benchmark as the ACD believes it best reflects the target of returns above inflation over a five to seven year investment cycle after costs.

Past performance is not a reliable indicator of future results.

## Managing Risk in the Fund

The SVS Cornelian Managed Growth RMP Fund is managed within Cornelian risk level C on a risk scale of A to E (A being the lowest and E being the highest risk). The Fund is one of a range of funds designed to achieve their RPI+ objectives whilst being managed below an upper expected risk limit. This upper expected risk limit is calculated by an independent third party and is based on the historical volatility of asset classes held within the fund. The upper expected volatility limit may change from time to time. The Fund's upper expected volatility is not the same as the actual (or historic) share price volatility.

Cornelian Risk Level	A	B	C	D	E
Upper Expected Volatility Limit (%)	6.30	8.40	10.50	12.60	14.70
Fund Expected Volatility (%)	5.96	7.21	8.74	10.72	13.06

## Important Information

All data provided by Brooks Macdonald Asset Management Limited accessed as at 31 August 2024 unless otherwise stated. The information presented in this factsheet, including charges and performance is for 'G' Shares and may differ from other share classes. Investment markets and conditions can change rapidly and as such the views expressed should not be taken as statements of fact, nor should reliance be placed on these views when making investment decisions. The price of your investments and the income from them can go down as well as up and neither is guaranteed.

Investors may not get back the amount invested. Past performance is not a reliable indicator of future results. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. The value of your investment may be impacted if the issuers of underlying fixed interest holdings default, or market perception of their credit risk changes. There are additional risks associated with investments in emerging or developing markets. Previously, the OCF (Ongoing Charges Figure) included expenses incurred by underlying holdings of collective investment schemes in relation to the Fund (the synthetic 'OCF'). Following guidance issued by the Investment Association on 2 July 2020, the synthetic OCF calculation has been expanded to include closed ended vehicles such as investment trusts.
